

Ethic Line web presentation

AHUMADOS MEDITERRÁNEOS, S.L. is an entity strongly committed to regulatory compliance, good practices, transparency, equality, sustainability and efficiency, both in relation with the staff as well as with third parties.

In order to comply with these principles, an Ethic Line has been implemented, which can be used by any person.

The Ethic Line allows communications to be carried out securely, confidentially, and anonymously through a digital platform where the informant can keep in contact with the organisation while preserving his or her identity.

For this purpose, a procedure and a person has been designated to manage the Ethic Line.

The information provided through the Ethic Line will be processed for the exclusive purpose of analysing, detecting, reporting and, when applicable, preventing potentially illegal behaviours.

The Ethic Line is managed by an external entity, thus guaranteeing maximum confidentiality, independence, efficiency, and objectivity regarding the communications that had been made.

You can consult the Ethic Line protocol through the following link:
